Lab: Azure CLI Setup

Learning Objectives

By completing this lab, you will be able to:

- Install and verify the Azure CLI
- Authenticate to an Azure subscription from the command line

Implementation Steps

Step 1: Install the Azure CLI

Execution

```
Install the CLI for your operating system.

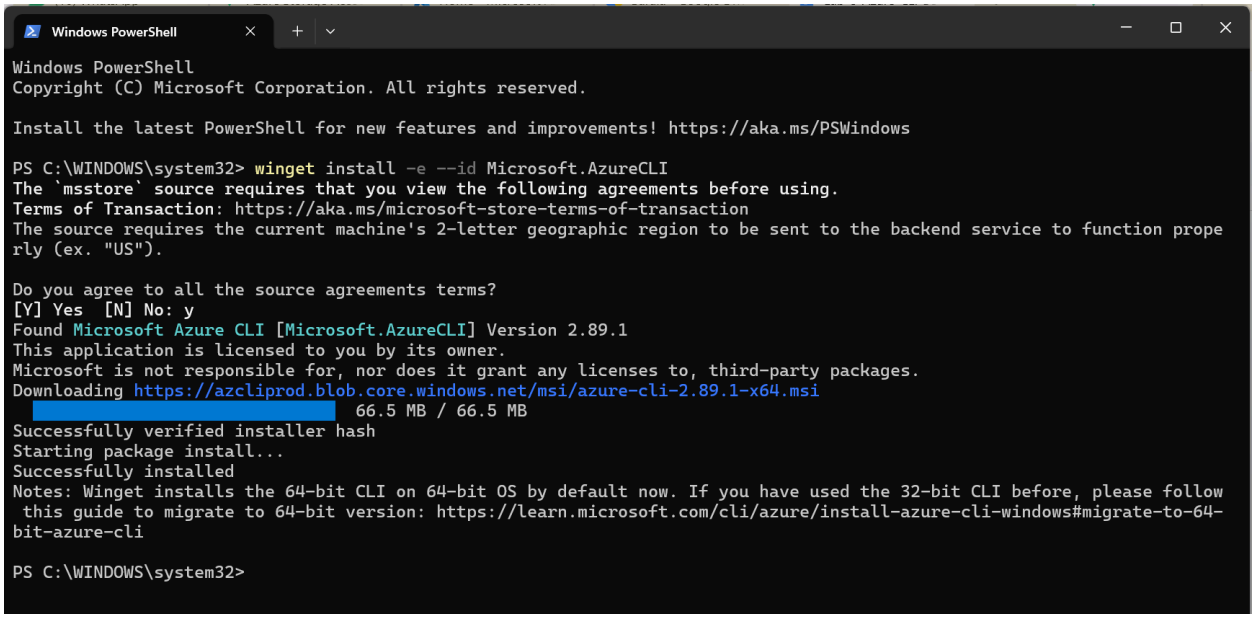

On Linux:

curl -sL https://aka.ms/InstallAzureCLIDeb | sudo bash
On macOS:

brew install azure-cli
On Windows, download and run the MSI installer from the
Microsoft documentation.
```

Expected Output / Outcome

The Azure CLI is installed on the local machine.

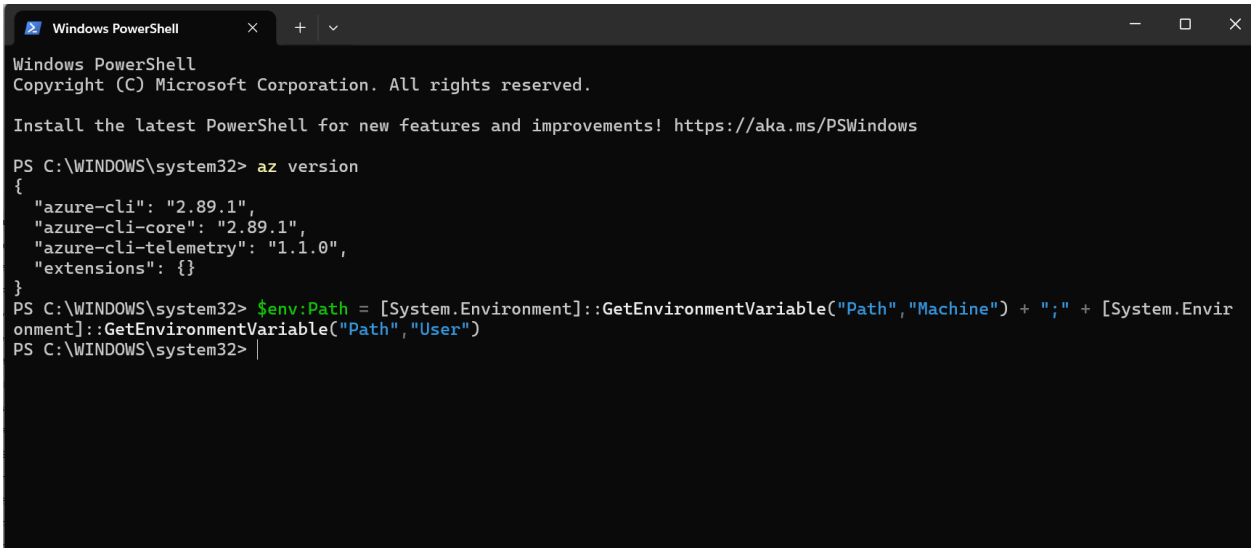

Step 2: Verify the Installation

Execution

```
Run:
az version
```

Expected Output / Outcome

The command returns the installed CLI version in JSON format.

Step 3: Sign In to Azure

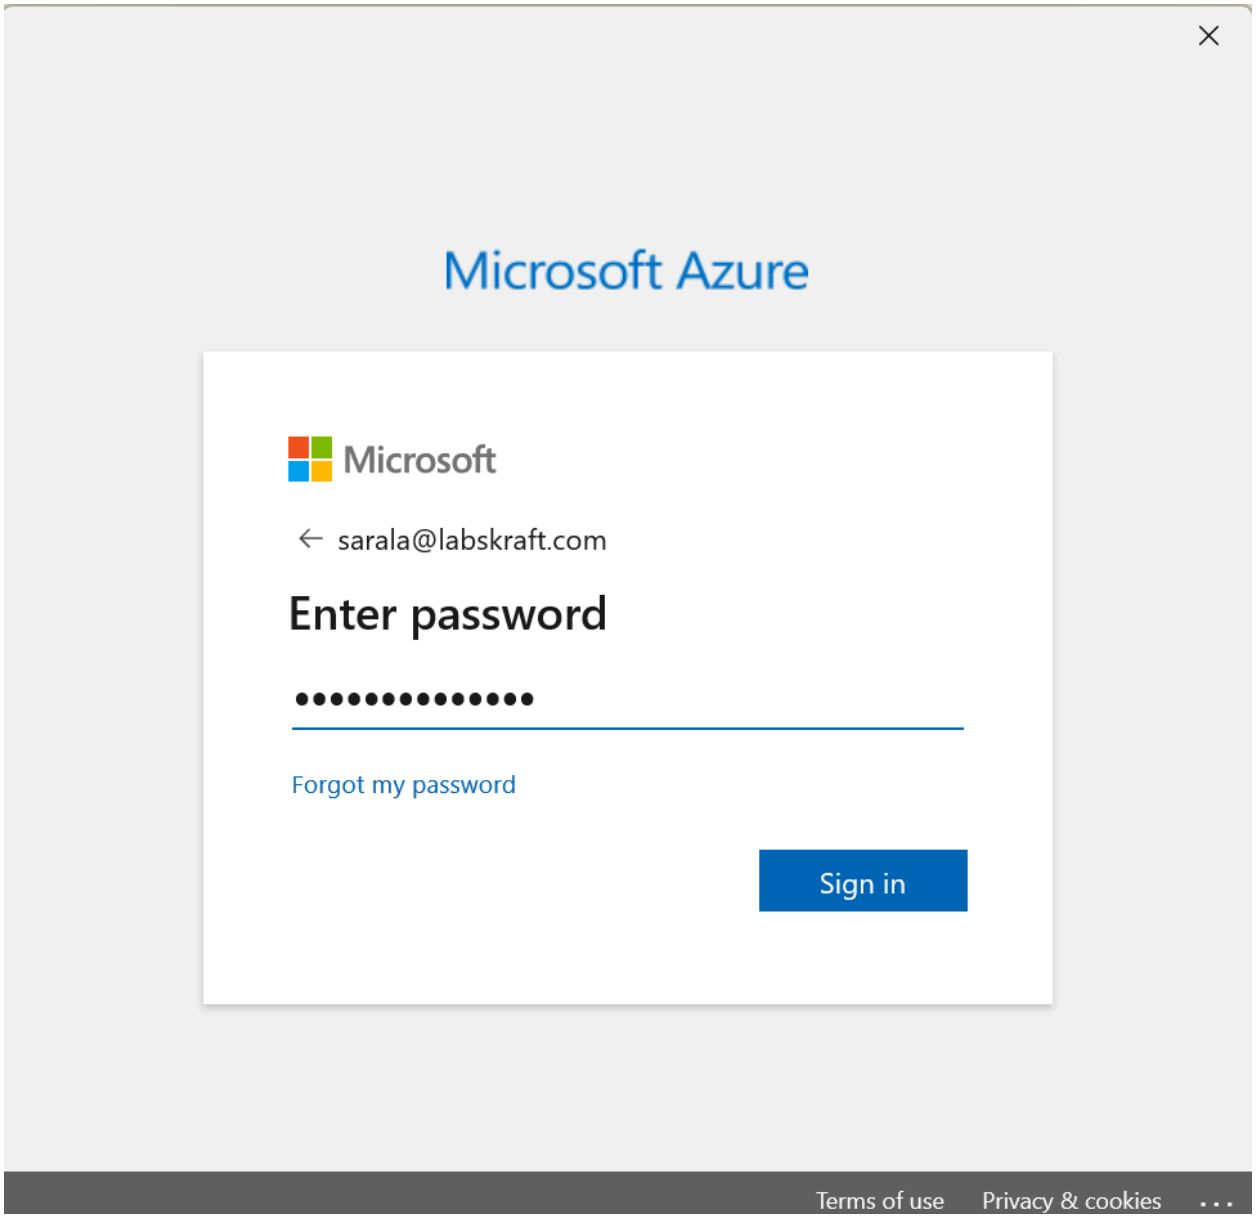

Execution

```
Run:

az login
Complete authentication in the browser window that opens.
```

Expected Output / Outcome

The CLI returns the list of subscriptions available to your account.

Step 4: Set the Active Subscription

Execution

```
Run:
az account list --output table
az account set --subscription "<subscription-name>"
```

Expected Output / Outcome

The specified subscription becomes the active context for all subsequent commands.
